Federal Research Center "Computer Science and Control" of the Russian Academy of Sciences, Lomonosov Moscow State University, and RUDN University invite you to participate in the 17th International Conference on Intelligent Systems (INTELS'27), that will take place on **March 30–April 1, 2027** in **Moscow, Russia**.

The Conference focuses on areas of intelligent systems and artificial intelligence and their application to sustainable development and new challenges of the society. The Conference provides a leading international forum that brings together science and industry from diverse fields with the purpose of exploring the fundamentals, technologies, achievements, and impact of artificial intelligence.

Venue: Moscow, Russia
Format: Hybrid (in-person & online)
Topics of interest include but not limited to

Track 1. AI Theoretical Aspects
- Theoretical Foundation of Intelligent Systems
- Optimal Control and Optimization
- Numerical Methods in Control
- Informatics and Computer Science for Artificial Intelligence
- Nonlinear and Uncertain Systems
- Game Theory and Decision Making
- Models and Identification Methods
- Intelligent Systems in Robotics
- AI in Digital Humanities
- Current Trends in Education for Artificial Intelligence

Track 2. AI Tools and Applications
- Neural Processing Systems
- Machine Learning
- Symbolic Regression and Genetic Programming
- Evolutionary Computations
- Big Data Analysis
- Text Mining
- Image Processing
- Navigation Systems
- Adaptive Security Architecture for Intelligent Systems

Conference Proceedings will be published in Springer's Advances in Computer Science Applications and Research (ACSAR), indexed in Scopus.
